

Erie County Lead Hazard Reduction

- Erie County Department of Health provides access to lead hazard remediation programs. These programs are funded through state and federal sources. Funds can go towards making units lead safe in pre-1978 housing where children live or visit frequently. Properties can be both owner- or renter-occupied, though certain conditions apply for landlords receiving grant support. For more information, visit: <https://www2.erie.gov/health/index.php?q=node/36>
